*pavement piece #2: bananas and clam chowder*

dimensions variable

unique

The work consists of one or more sidewalk pavers\* made of: poured concrete, bananas and clam chowder\*\*\*. The work can be made anywhere anytime. It's recommended the bananas and clam chowder be completely concealed/submerged once the concrete sets.

\*Pavers aren't required, but a publicly trafficked area somewhat-uniformly\*\* paved in concrete is, e.g. courtyard, plaza.

\*\*i.e. one in which the visual predominance of concrete would be easily noticed.

\*\*\*New England clam chowder is highly recommended.
